Education

College of Vocational Studies
Belgrade Polytechnic (2010 - 2014)

- **Graphic Design (Bachelor's degree)**

About Me

I'm a UX/UI & Product Designer with almost 10 years of experience in IT across digital products, web, and visual design, working with agencies, companies, and clients across different industries.

I combine strong design skills with a solid technical understanding of front-end development, allowing me to work effectively across the full product lifecycle - from research, concepts, and wireframes to final UI, implementation, and delivery.

Alongside design, I have experience coordinating projects and organizing team workflows, working closely with product managers, developers, designers, and other stakeholders, and guiding junior team members to keep projects moving toward their goals. I'm a practical problem-solver who understands both user needs and business requirements, with experience turning complex ideas into clear, usable, and scalable digital experiences.

Languages

- Serbian language (Native)
- English Language (Upper Intermediate)

WORK EXPERIENCE

Soccerbet / Phuket doo Belgrade **Sports Betting & Casino Operator**

July 2026 – Present

- Processing sports betting ticket transactions, payouts, and winnings.
- Assisting customers with sports events, betting odds, and gaming services.
- Handling casino machine transactions and electronic gaming services, including deposits and payouts.
- Managing cash transactions, maintaining accurate cash balances, and ensuring transaction accuracy.
- Executed operational procedures, verified betting tickets, handled customer inquiries, and introduced clients to sports betting promotions and company offers.

BD1 Consulting, Belgrade / Hackerseye, Tel Aviv **Web & UI/UX Product Designer**

March 2022 – April 2026 (Onsite)

Designed and contributed to company's enterprise B2B cybersecurity platforms and websites, leading end-to-end UX/UI design, web and graphic design, and cross-functional project coordination Worked closely with company leadership, product managers, designers, & developers to translate requirements into practical solutions and support projects from initial concepts through implementation & ongoing improvements. Managed cross-functional projects from concept through implementation, contributing to product development, platform improvements, marketing effectiveness, brand consistency, and sales objectives.

UX/UI & Product Designer:

- Led the UX/UI design process across multiple cybersecurity platforms, websites, from research, requirements, concepts, and wireframes to high-fidelity UI, prototyping, and post-launch improvements.
- Solved complex UX challenges across data-heavy cybersecurity enterprise platforms, balancing advanced functionality with usability for both technical and non-technical users.
- Built and maintained Figma design systems, reusable components, and organized design files to ensure consistency and support efficient developer handoff.
- Updated & maintained LMS content across platforms including courses, training games, phishing campaigns & learning materials, while identifying & resolving platform bugs and issues.

Cybersecurity platforms I worked on:

- Hackers Range: Cybersecurity training & simulation platform with LMS system.
- HackersEye Suite: Enterprise detection & response platform (MDR / SOC).
- BeCyber: Cybersecurity awareness & phishing prevention platform.
- Intelligence: Cyber threat intelligence platform for dark web monitoring & exposure detection.

Graphic & Web designer:

- Designed & maintained company websites, landing pages, and email templates.
- Implemented designs using HTML, CSS, and JavaScript.
- Managed WordPress websites including content updates, design changes, performance optimization, Google Anlytics, SEO & plugins to keep sites running smoothly.
- Created branding and marketing assets, including logos, presentations, documents, banners, social media visuals, and videos.

Project Coordinator

- Acted as the bridge between design and development - collaborating directly with the CEO, CTO, and Product Managers to clarify project requirements, roadmap new features, and support seamless technical implementation
- Coordinated with designers and developers to refine existing features, identify usability issues, and implement new functionality across platforms and websites.
- Coordinated feature refinement, solving usability challenges and translating product concepts into practical, high-functioning web solutions.
- Mentored a junior graphic designer and supported collaboration across design, development, and product teams.
- Organized project tasks and workflows using Monday.com, driving marketing team alignment through structured planning, tracking, and meeting summaries.

Freelancer **Graphic/Web Designer & Front-end developer**

July 2017 – March 2022 (Remote)

Worked as a freelance designer/developer, delivering 100+ small and medium web and graphic design projects for international clients a& outsourcing agencies across the USA and Europe, acquired through Upwork and other freelance platforms. Partnered on long-term collaborations with companies like Web Wiz, Accutax, and Budgeted Ventures, specializing in end-to-end design, web development, and front-end implementation. Earned 'Top Rated' status on Upwork driven by consistent 100% positive client feedback and reliable execution.

Web Wiz Inc Agency, New York **Graphic/Web Designer**

May 2019 – March 2022 (Remote)

- Communicated directly with clients and collaborated with front/back-end developers

SKILLS & AREA OF EXPERTISE

UI/UX & Product Design:

Figma *Wireframing* *Prototyping* *UX research* *Competitor analysis* *User flows* *Usability* *Design systems*

- Designing digital products end-to-end - from research and wireframes to high-fidelity UI, design systems, and post-launch optimization based on real-world usage and testing.
- Conducting user research and usability testing to validate designs - creating responsive, accessible, mobile-first solutions that bridge design and development for technical feasibility.
- Building design systems in Figma (auto-layout, component libraries, variables) - creating organized, scalable files for consistency and smooth developer handoff.
- Applying design thinking to solve complex problems - collaborating closely with product managers, developers, and stakeholders to ensure designs are user-centered and technically feasible.
- Mentored and guided junior designers through active projects, establishing design standards, usability best practices, and design systems to ensure quality and consistency.

Graphic & Web Design:

Website Design *Landing Pages* *Email templates* *Mobile App Design* *Wireframes & page layouts* *Responsive layouts*

Adobe Creative Suite *Figma* *Branding* *Visual Identity* *Marketing Materials* *Video editing* *AI-Assisted Design*

- Designing websites and landing pages with a focus on usability, clarity, and conversion.
- Creating wireframes, page layouts, UI concepts, and content structures for clear navigation and user journeys.
- Creating responsive, mobile-first designs with SEO best practices and performance optimization - ensuring excellent experience across all devices.
- Designing email templates, newsletters, & marketing pages optimized for engagement & conversions across digital campaigns.
- Creating visual assets for print and digital media, including: branding, logos, pptx presentations, company documents, marketing materials, icons, social media banners, promotional videos etc.
- Applying principles of layout, typography, color, and visual hierarchy to create clear, consistent designs.
- Using AI-assisted tools to explore concepts, improve and speed up creative workflows.

Web Development / Front-end:

HTML *CSS* *Bootstrap* *Wordpress* *Responsive Design* *HTML Email templates* *SEO & Google Analytics*

Design to Code *Website Deployment & Hosting* *Debugging* *AI-Assisted Development*

- Implementing designs into clean, responsive code using HTML, CSS, Bootstrap, and basic JavaScript.
- Using AI-assisted tools (ChatGPT, Gemini,Claude) to solve coding challenges and accelerate development.
- Translating designs from Figma / PSD / AI into HTML code.
- WordPress: designing and updating websites, managing themes, plugins, and content.
- Deploying websites to live servers, troubleshooting issues, fixing bugs, and improving website stability.
- Applying basic SEO practices, improving website performance and browser compatibility, and integrating Google Analytics.
- Combining design and front-end knowledge to assess technical feasibility, understand implementation requirements, and collaborate effectively with developers.

Project Cordination & Team Collaboration Skills:

Task organization *Project Planning* *Team coordination* *Project Management Tools* *Stakeholder Communication*

- Led coordination of cross-functional marketing team (designers, developers,copywriters, PPC specialists) across multiple simultaneous projects, ensuring timely and high-quality delivery.
- Bridged design and development teams effectively by understanding both disciplines -communicating UX/UI requirements to developers and technical constraints to designers.
- Organizing project tasks, priorities, and workflows to support smooth and timely delivery.
- Gathering & clarifying project requirements with product managers, stakeholders, designers, and developers to ensure a clear understanding of project goals.
- Guiding designers and developers through design requirements, design systems, and implementation details.
- Experience working in cross-functional teams, including remote and distributed environments.
- Managing project tasks and team communication using Monday.com and Jira.
- Supporting digital projects from planning and design through development and delivery.
